## SUMMARY

Senior Web Developer with extensive experience in developing responsive websites and custom web applications, currently leading projects at Chameleon IT Services. Proficient in PHP CodeIgniter, Laravel, and WordPress, with a strong focus on WooCommerce customisation and SEO implementation. Previously served as Software Team In Charge at Shalom Ministries, overseeing the development of an in-house software suite to streamline organisational operations. Skilled in integrating Cloudflare for enhanced security and performance, and adept at using AWS for scalable solutions. Career goals include advancing expertise in cloud technologies and continuing to deliver innovative digital solutions.

## EXPERIENCE

02/2022 - Current

### Senior Web Developer Chameleon IT Services

As a Senior Web Developer at Chameleon IT Services, I was responsible for.

- Developing responsive and dynamic websites tailored to client requirements.
- Managing and customising WooCommerce stores, including plugin and theme development.
- Building custom web applications and business management tools.
- Implementing SEO best practices and structured data to improve search visibility.
- Performing site optimisation to enhance speed, performance, and user experience.
- Using Cloudflare for DNS management, security enhancements, and performance boosting (CDN, caching, and firewall rules).
- Integrating Zoho Suite tools (CRM, Mail, and Forms) into client systems for marketing automation and business workflows.
- Configuring caching plugins such as LiteSpeed Cache, NitroPack, and WP Rocket for WordPress to improve load speeds, compress assets, implement smart caching rules, and reduce server response times.
- Conducting technical audits to resolve Core Web Vitals issues and script optimisation.
- Ensuring mobile responsiveness, accessibility, and cross-browser compatibility.

04/2014 - 02/2022

### Software team In Charge Shalom Ministries

Shalom Ministries is a multifaceted organisation comprising several branches, including:

- Media Ministry - Shalom TV.
  - Publication Ministry - ShalomTimes, SundayShalom, and ShalomTidings.
- To support its internal operations, a dedicated in-house software suite called **Shalom Soft** was developed. This team-based project integrates both web and software modules, tailored to meet the organisation's complex needs. Key modules of **Shalom Soft** include:
- Customer Relationship Management (CRM).
  - Accounting and Financial Management.
  - Asset and Inventory Management.
  - Human Resource Management.
  - Subscriber and Agent Management for Publications.
